

New in our group of companies, the Folmeg Engineering + Maschinenbau

Schuy Maschinenbau GmbH in Hünfeld, worldwide known as a manufacturer of filling and final packaging systems, was taken over by Folmeg Engineering + Maschinenbau in Eschwege in March 2017.

Exactly 40 years after the foundation of Hans Schuy GmbH, the former owner, Mr. Schuy, has handed over the responsibility for his company to Mr. Folmeg. The highly qualified and motivated SCHUY team continues to be available to our customers with the usual excellent quality and reliable service.

Folmeg Engineering's core competencies lie in the construction of individual and tailor-made end-of-line packaging systems for primary packaging.

Project realisation: Jägermeister / Wolfenbüttel

Further information is available on our website: www.folmeg.de

In the next issue a.o.:

- The world-renowned SCHUY general overhaul
- New generation of the Easyline series
- Filling and packaging line for filled lids

Managing Director
Udo Folmeg

Dear customers and business partners,

we wish you a good start into the year 2019 with the successful implementation of your own goals and wishes.

On behalf of my team, I would like to thank you for your loyalty and trust in our company. We are looking forward to a continued our good cooperation. We will do what is necessary to supply you with first-class machines and excellent service in the future as well. With our newsletter we would like to inform you about our latest machine innovations, but also keep you up to date about personnel and organizational customer-focused developments.

This certainly includes the closely interlocked cooperation of affiliated companies with even more customer-oriented development. This is achieved by merging of Schuy + Folmeg. We are looking forward to a good and intensive cooperation and should lay the foundation for a successful year 2019 at the beginning of the year. According to Friedrich Nietzsche "only at the end of a year one knows how his beginning was".

Your Udo Folmeg
Managing Director

People / team

Mr. Kokel is responsible for our sales team. In our sales team offers for new machines, overhaul of existing machines, spare parts as well as service are compiled. You can reach Mr. Kokel under Phone: 06652/ 606 25 or by mail: m.kokel@schuy.com

Schuy supplies complete filling and final packaging line from a single source

Last year, a customer was looking for a filling and final packaging system for its coconut-based vegetable products as an alternative to classic yoghurt. Our rotary machine from the SchuCup series in ultra-clean design was able to convince quickly.

A further special feature, next to the Ultra-Clean-Design, is the dynamic fruit mixing station used by the customer to mix his product directly at the doser with different flavours (e.g. strawberry, pineapple, mango, etc.).

Once the cups have been filled and sealed, they must be finally packaged for retail sale. Here the customer opted for the SchuPack COMBI-Packer. The arriving cups are placed directly in a previously folded and glued tray with a servo-controlled gripper head (see page 2).

Schuy - Service + spare parts

We offer services (service checks, overhauls) and spare parts for all filling and final packaging systems supplied by us as well as for used third-party products. In addition, we also offer complete general overhauls in order to increase the service life and availability of the machines already in use.

Trends / Development

We have met customer requirements and developed a SchuPack COMBI-Packer. With this combination system, crates can be erected and incoming cups can be inserted directly into them. Thanks to the latest servo technology, this system impresses with short set-up times and a high degree of flexibility. The compact design of the system allows an easy integration into existing, difficult space conditions.

Machine details

SchuCup 7000 RL in Ultra-Clean

- Capacity: approx. 7,000 cups/hour
- 3-track rotary system
- Latest servo technology
- Ultra-clean design:
 - incl. laminar flow cover
 - incl. UVC packaging disinfection
- Dynamic fruit mixing station
- Snap on lid station

SchuPack COMBI- Packer

- capacity : approx. 7,000 cups
- Latest servo technology
- Folding and gluing the crates
- Integrated packer
